

## **Auriga Energy's fuel cells continue to power the Hydrogenesis in its 7th year**

UK's first fuel cell passenger boat, the Hydrogenesis, powered by *Auriga Energy's* fuel cell system, has entered its 7<sup>th</sup> year of service of leisure trips around Bristol Harbourside after its winter refreshment.

Launched in 2012, it is still the only emission-free fuel cell passenger boat operating in the UK. The Hydrogenesis has proved very reliable, economic and is appreciated for its quiet vibration-free glide around the waterways.

Clean and green, producing zero emissions, the Hydrogenesis continues to lead the way towards the 'net-zero' contribution to global warming target recently set by the UK Committee on Climate Change, delivering tangible reductions in CO<sub>2</sub>, NO<sub>x</sub> and particulate emissions.
